

Dear Doggy Daycare Clients,

This is a friendly reminder of the rules and regulations of doggy daycare:

1. Please make sure your dog is up to date with all required vaccinations at all times, and that we have your updates in our computer records.
2. Dogs must be spayed or neutered by 6 months of age.
3. You are responsible to get the Kennel Cough (Bordatella) vaccination and a fecal/giardia exam done **every 6 months**.
4. Any time you update your dogs kennel cough vaccination, they should have a resting period of **3 days** for their 6 month update.
5. If they are having a kennel cough update that is overdue, or have not visited the daycare in awhile, then they should have a resting period of **7-10 days**.
6. If your dog is feeling under the weather (vomiting, diarrhea, lethargy, vet visit with vaccinations the day prior, or limping and discomfort) then please keep them home and rested until they are back to their tail wagging self.

Team Tail Waggers priority is to keep your four-legged friends safe, healthy, and happy. We want all of our furry friends to play in the safest, healthiest environment possible.

Thank you for your cooperation,

Team Tail Waggers
